RESUME OBJECTIVES

I have completed all the requirements the qualification Bachelor of Science in Computer Science and Computer Applications from the University of Witwatersrand.

I'm flexible to work anytime, I am a fast learner, able to take initiative and work under pressure without compromising the quality of work. I'm a great team player, honest, dedicated, and trustworthy. I have ability to think critically and come up with innovative solutions to problems. I have worked on various projects before which helped me gain skills to design, develop, and maintain software applications. I also applied my problem solving skills on various tasks in my tertiary journey.

I am ready to apply what I learned at school and in my journey to solve real world problems and I am keen to gain experience in the computer science industry to enhance my skills. I would love working in the environment that challenges me and provides opportunity for growth.

I am familiar with various programming languages which includes Java, Python, C++, C, JAVASCRIPT, CSS, Flutter and HTML. I can't say I have a preferred programming language, what I prefer is to be part of organization where I can grow without the need to change career paths.
